

Environmental Policy

May 2007

Philosophy:

We all have a duty to preserve and protect our environment. Business and Corporate bodies have enormous power to drive for positive climate change through policy and practical activities. It is imperative that we take stock of our working practices and, where possible, opt for environmentally friendly options - it is better to use less electricity than to just carbon offset. Reece Productions Limited will promote this philosophy through its business activities, whilst remaining competitive and relevant.

Our Aims:

- Understand our business's impact on our environment.
- Promote better practice within our activities to reduce any impact.
- Continually re-asses and improve.
- Educate employees and sub-contractors to raise awareness of our aims, and improve practices.
- Raise customer awareness of our aims, and inform them of the footprint of their own event.

To Achieve Our Aims:

- Calculate the carbon footprint of our business.
- Calculate the carbon footprint for each event.
- Calculate the carbon footprint of all travel and transport.
- Invest in high efficient technology and equipment – LED lighting, efficient Speaker systems, etc.
- Reduce use of paper and packaging - recycle waste paper and 'junk mail'.
